

Employee and Volunteer 2011 Flu Shot Schedule

CALL 775.770.3553 FOR INFORMATION

Did you know in 2010 approximately 40 percent of healthcare workers were not immunized against the flu? Even if you are healthy, you should be immunized to help protect your patients, co-workers and families. The flu vaccine is the best way to prevent getting or spreading the flu. The influenza vaccination is made from killed viruses and you cannot get the flu from the vaccine. **Saint Mary's requires all employees who do not receive a flu shot to sign a flu declination form and turn it in to Employee Health by November 18.**
